**Subject:** QA of formaldehyde evidence tables: next batch  
**Attachments:** Formaldehyde\_TR\_Tables\_071213.docx

Dear Team,

I have compiled a batch of 116 rows (smaller number of studies) from our evidence tables for QA review by the contractor. I selected those studies that were referred to in the integration of evidence at the end of each synthesis for each health domain or in the weight of evidence section at the end of the first section, or in the dose-response section 2.

Please take a look at the file - the rows shaded bright green. If there are additional studies that you feel are key for the assessment and should be QA'd, please list them for me in an email.

Please let me know either way by the end of the day on Tuesday July 16th.

Thank you, Barbara
